

42" IR multi-touch Panel PC with Core 2 Quad processor (Future Interface is Multi-Touch to change the way we interact with PC)

Winsonic has designed 42" IR multi-touch Panel PC with powerful processor. While touch sensing is commonplace for single points of contact, multi-touch systems enables a user to interact with a system with more than one finger at a time, allowing for the use of both hands along with chording gestures. These kinds of interactions hold tremendous potential for advances in efficiency, usability, and intuitiveness. Multi-touch systems are inherently also able to accommodate multiple users simultaneously, which is especially useful for collaborative scenarios such as interactive walls and tabletops.

**Intel® Core™ 2
Quad system**

Intel® Core™ 2 Quad
45nm CPU, Q9400 (6M
Cache, 2.66 GHz, 1333
MHz FSB) nVIDIA®
MCP7A-U system
chipset with GeForce® 9400 graphic
chipset integrated 4GB DDR2/800 SDRAM (2
x SO-DIMM, up to 4GB)
